in less than 6 months, my ejection fraction doubled from 20 to 40 and all of the symptoms of congestive heart failure disappeared.

The FDA drew attention to a raised risk of a life-threatening lung condition called persistent pulmonary hypertension.

Who are you jealous of in the dream? Is it someone you know or is it a stranger? If it's someone you know, this may be a literal dream.

My mother beat me up because I didn't tell her about it (I was scared to tell her, I thought she...
